

## Video Sites

Video posting is one of the "Hottest" activities that a website owner/promoter can do to drive massive traffic to your online business. The search engines do not realize the content contained in the Videos.

Google, Yahoo, MSN and the others only see your Title, subject you entered and total time the video runs... so you can put up a Photo with voice-over, Power Point Presentation or an actual video you have created.

So take the same Video and change the 3 factors, Title, Subject and the time the video runs.

Post, Post, Post... more the better...

Video Editing Tools...

Post your Videos to multiple site all at one time with TubeMogul

Top video hosting sites - you can get some insane traffic to your affiliate link by posting some simple videos to these sites:
